

CORPORATE MEMORY

Make your company's knowledge usable — before it's lost

Documents, processes and hands-on expertise in one AI-powered place — easier to find, easier to understand and ready to use day to day. Built for mid-sized companies where knowledge is scattered and tied to individual people.

01 The Problem

Most companies don't have a knowledge problem — they have an **access problem**. The information exists, but it's scattered across file servers, email, PDFs, CRM and project folders.

- long search times
 - inconsistent answers
 - knowledge lost when people are away
- repeated follow-up questions
 - slow onboarding
 - reliance on a few key people

02 The Solution

An AI-powered knowledge solution for internal company information. Employees ask questions in **plain language** and get structured answers drawn from approved company information.

- “How do we handle a short-notice change to a job assignment?”
- “Which documents do we need for a traffic-safety quote?”
- “What was last discussed on the client project?”

03 The Everyday Benefit

Faster access
One central point of access instead of digging through folders and email.

Better preparation
Prepare quotes, meetings and projects faster and on a firmer footing.

Consistent answers
Reliable, traceable information across every department.

Less dependency
Knowledge stays in the company through holidays, sick leave or staff changes.

Smooth handovers
Clear handovers between office, sales, project management and field teams.

Faster onboarding
New colleagues get up to speed sooner and more independently.

04 How It Works

05 Who It's For

- Management & assistants

Sales & quoting

Project & resource planning

Customer service & back office

Technical documentation
- Quality management

Onboarding & cover

Especially valuable for skilled trades, construction, technical services, traffic safety, event security, facility services, industry and retail — anywhere knowledge has grown over time and is tied to specific people.
