

AI SOLUTIONS FOR ELECTRICAL CONTRACTORS

A clearer overview of enquiries, job sites, callbacks and documentation

A great deal of operational knowledge sits in people's heads, emails, WhatsApp threads, folders, plans and old quotes. KrambergAI eases the daily office workload, makes information faster to find and brings structure to recurring tasks – practical support for the field, the office, service teams and management, not a gimmick.

Six areas of everyday practice

Benefits for your business

- ✓ Less time spent searching in the office
- ✓ Faster responses to customer enquiries
- ✓ Better-prepared quotes
- ✓ Less information lost between office and site
- ✓ More structured handovers to technicians
- ✓ A more professional impression with customers

How getting started works

- 1 A look at your daily operations**
Typical enquiries, workflows and bottlenecks.
- 2 Choose worthwhile use cases**
Where AI delivers real value in the short term.
- 3 Implement the first AI building block**
e.g. an enquiry assistant, quoting or documentation aid.
- 4 Expand step by step**
Add further areas such as service handling or knowledge search.

Next step

Let us assess which AI use cases make sense for your electrical business in the short term – small, practical and a fit for how you already work.
