

AI SUPPORT FOR EVERYDAY PLUMBING & HVAC OPERATIONS

Sort customer requests faster. Prepare better quotes. Ease the service load.

In plumbing and HVAC businesses, everything runs at once – a heating breakdown, a maintenance visit, a bathroom renovation, a heat pump, a callback and a quote. The real challenge is rarely the work itself, but the office: information sits scattered across emails, sticky notes, photos, old quotes and in the heads of individual staff. **KrambergAI** helps you structure requests, callbacks, quote preparation, job scheduling and documentation.

FROM FIRST REQUEST TO CLEAN DOCUMENTATION

Request

A breakdown, service or upgrade comes in

Triage

Device, fault, photo, address & urgency captured

Callback / Appointment

The office decides quickly and precisely

Job / Quote

Service call & quote better prepared

Documentation

Job, report & knowledge filed cleanly

What KrambergAI supports

- Pre-structure requests for service, breakdowns & upgrades
- Capture callback notes cleanly and in full
- Collect details on device, fault code, photo & property
- Speed up quote preparation for bathrooms, heating & heat pumps
- Structure technician reports & job notes
- Improve handovers between office and job site
- Support follow-ups on open quotes

KrambergAI does not replace skilled tradespeople – it makes office work, customer communication and preparation more efficient.

What your business gains

- ✓ Fewer incomplete requests & duplicate follow-ups
- ✓ Faster response to breakdowns, service & upgrades
- ✓ Better prepared service calls & job sites
- ✓ Cleaner documentation of job information
- ✓ A clearer overview of open quotes & callbacks
- ✓ More usable knowledge about customers & systems
- ✓ Relief for the office, dispatch & management

A day-to-day example

A customer reports a heating fault. Instead of just “the heating isn’t working,” the device type, fault code, year of installation, last service, photos, address and urgency are captured right away. The office decides faster: a callback, a service visit, a spare-parts check – or an opportunity to upgrade.

ESPECIALLY SUITED TO BUSINESSES WITH

Service & maintenance

Heating installation & upgrades

Bathroom design & renovation

Heat pumps & energy technology

Air conditioning & ventilation

multiple field teams

a heavy office workload

many callbacks & open quotes

Your next step: the KrambergAI AI Quick Check

Together we pinpoint where your plumbing & HVAC business can be relieved quickly – across requests, callbacks, quotes, scheduling, documentation and internal knowledge.
