

AI SOLUTIONS FOR SCAFFOLDING COMPANIES

Stay on top of enquiries, measurements, quotes and crews

In scaffolding, speed matters: an enquiry comes in, the site has to be understood, questions cleared up, measurements taken and a quote produced quickly — and the crew needs clear information for erection, alteration and dismantling. This is exactly where KrambergAI takes the pressure off the office, site management, scheduling and management.

PRACTICAL RELIEF — NOT AN IT PROJECT

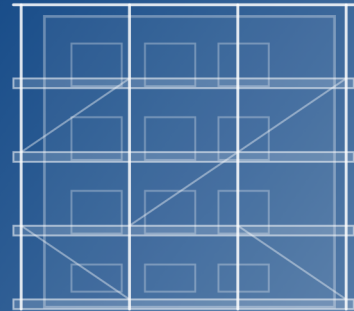

Not an abstract AI solution, but concrete help with capturing enquiries, preparing callbacks, quote documents, site handovers, documentation and internal knowledge search.

Office

Site management

Scheduling

Crew

**Where KrambergAI helps in practice**

Six building blocks for everyday scaffolding work

**Enquiries & Callbacks**

Pre-sort incoming enquiries, surface missing details, and prepare follow-up questions and email replies.

**Measurements & Site Data**

Capture height, length, standing time, access, ground conditions and special requirements in a structured way.

**Quotes & Variations**

Bring together details from the enquiry, photos and past projects into review-ready quote and variation texts.

**Material & Crews**

Consolidate material, scheduling and requirements for façade, protective and roof-edge scaffolds.

**Site Handover**

Address, contact, area, safety and material notes as a clear handover to the crew.

**Documentation & Knowledge**

Make past quotes, plans, photos and checklists searchable, and document changes cleanly.

Especially for companies working with façade, working and protective scaffolds, roof-edge scaffolds, stair towers, weather protection, special structures, alterations, partial dismantling and extended standing times.

Your benefits

- ✓ Faster response to enquiries
- ✓ Better-prepared quotes & variations
- ✓ Less information lost between office & site
- ✓ Less time spent searching in the office
- ✓ Structured handovers to crews
- ✓ A more professional impression with clients

NEXT STEP

Have us assess which AI use cases make sense for your scaffolding company in the short term — starting with one concrete building block rather than a large IT project.
