

AI SOLUTIONS · TECHNICAL SERVICE PROVIDERS

When service, customer requests and job scheduling all run at once

Technical service providers rarely work to a fixed script: fault reports, maintenance requests, incomplete photos and short-notice jobs all arrive at once. At the same time, quotes need to be prepared, jobs coordinated and service reports written. KrambergAI helps you handle recurring workflows in a more structured way — from the initial request through job preparation to documentation.

ONE END-TO-END SERVICE PROCESS

Request

Captured cleanly

Follow-up

Prepared precisely

Quote

Created faster

Job

Optimally planned

Report

Structured documentation

Where KrambergAI helps in practice

Capture requests cleanly

Structured by site, system, location, priority and fault description.

Prepare follow-ups precisely

Identify missing details: serial number, device type, photos, access, history.

Prepare quotes faster

Building blocks for maintenance, repair, inspection, replacement or remote service.

Ease job scheduling

Address, contact, fault description, tools and spare parts all in one place.

Make company knowledge usable

Find service reports, checklists, protocols and know-how faster.

Simplify documentation

File job reports, inspection records, handovers and photos in a structured way.

Your benefits

- ✓ Fewer follow-up queries caused by incomplete information
- ✓ Faster preparation of quotes and service jobs
- ✓ Better handovers between office, dispatch and technicians
- ✓ Less time spent searching old reports, emails and folders
- ✓ Greater traceability in communication and documentation

How you get started

- 1 Map your request and service process
- 2 Review recurring documents, checklists and reports
- 3 Set up initial AI support for requests and job preparation
- 4 Start with one clearly defined service case
- 5 Review the results and expand step by step to further workflows

IDEAL FOR

Technical service companies

Maintenance & servicing

Facility & building technology

IT, electrical, machinery & plant

Field service & on-site jobs

How much time do you lose to incomplete service requests, manual follow-ups and searching for old job information?

KrambergAI works with you to identify which workflows can sensibly be supported by AI — controlled, practical and aligned with your existing processes.
